### WORKING SMOKE ALARMS SAVE LIVES

- 65% of home fire deaths happen in homes with no working smoke alarms.
- If you are asleep, smoke from a fire won't wake you— which is why smoke alarms are critical.
- Test smoke alarms monthly.
- Replace batteries in all smoke alarms at least once a year, or when your alarm "chirps."
- Replace all smoke alarms, including alarms that are hard-wired, when they are 10 years old or sooner if needed.
